EL LEGADO DE NUESTRA PASIÓN

Massi nació en el seno de una empresa con larga tradición ciclista que se remonta a 1934. Desde sus inicios Massi ha montado bicicletas enfocadas a la competición de manera artesanal teniendo como **primer objetivo velar por la máxima calidad de sus productos.**

Durante años hemos estado innovando y aplicando las **nuevas tecnologías y materiales** a nuestras bicicletas, desde los mejores aceros, hasta triple conificación de las acerías más prestigiosas, el titanio, el aluminio en aleaciones trabajadas especialmente para Massi, hasta las actuales composiciones en carbono dual shape de alto módulo en sistemas lug to lug y monocasco.

EN

Massi was born in a company with a long cycling tradition that dates back to 1934. Since its inception, Massi has set up bicycles focused on the competition in an artisanal way, with the main objective of ensuring the highest quality of its products.

For years we have been innovating and applying the new technologies and materials to our bicycles, from the best steels, to triple conification of the most prestigious steelworks, titanium, aluminum alloys worked especially for Massi, up to the current compositions in carbon dual shape high module in lug to lug and monocoque systems.

FR

Massi a vu le jour au sein d'une entreprise dont la tradition cycliste remonte à 1934. Depuis sa création, Massi a toujours proposé des vélos axés sur la compétition, élaborés de façon artisanale, avec pour objectif principal de proposer la meilleure qualité de ses produits.

Durant des années nous avons innové, en appliquant de nouvelles technologies et de nouveau matériaux à nos vélos, en passant par les meilleurs aciers LSO, les tubes triple butted, le titane, les alliages d'aluminium travaillés spécialement pour Massi, jusqu'aux actuels tubes carbone Ultra High Modulus Carbon Dual Shape Tech.

CONCEPT KIT

MILÍMETRO A MILÍMETRO

Si cada persona es única, ¿por qué nuestra bicicleta no puede serlo? Esta es la eterna pregunta que nos hemos hecho durante años. En competición, hemos ajustado y montado cada componente al milímetro para que nuestros corredores consigan sacar el 100% de sí mismos en cada prueba. Entonces, ¿por qué no trasladar esta idea a nuestros clientes?

De esta premisa, lanzamos el Concept Kit para que cada usuario pueda elegir los componentes que mejor se adapten a sus objetivos para crear una bicicleta única y a la carta.

No te conformes con montajes realizados en serie que posiblemente no estén hechos a medida para tu conducción, fuerza y geometría. Acércate a tu punto de venta Massi más cercano y deja asesorarte por uno de nuestros profesionales para encontrar esa bicicleta que siempre has soñado.

EN

If each person is unique, why can't our bike be? This is the eternal question we have asked ourselves for years. In competition, we have adjusted and assembled each component to the millimeter so that our riders get 100% of themselves in each test. So why not transfer this idea to our customers? From this premise, we launched the Kit Concept so that each user can choose the components that best suit their objectives creating a unique and on-demand bicycle.

Do not settle for mass produced bikes that may not be tailored for your cycling, strength or geometry. Approach to your nearest Massi dealer and let yourself be advised by one of our professionals to find the bike you have always dreamed of.

FR

Si chaque personne est unique, pourquoi notre vélo ne peut-il pas l'être ? Telle est la question éternelle que nous nous posons depuis des années. En compétition, nous avons ajusté et assemblé chaque composant au millimètre afin que nos coureurs donnent 100% d'eux-mêmes à chaque course. Alors pourquoi ne pas transposer cette idée à nos clients? Partant de là, nous avons lancé le concept du kit afin que chaque utilisateur puisse choisir les composants les mieux adaptés à ses objectifs pour créer un vélo unique et à la demande.

Ne vous contentez pas d'assemblages réalisés en série qui pourraient ne pas être adaptés à votre pratique, à votre niveau et à votre physiologie. Adressez-vous à votre point de vente Massi le plus proche et laissez-vous conseiller par l'un de nos professionnels pour trouver le vélo dont vous avez toujours rêvé.

SPECS.

TECNOLOGÍA

ACCT Carbon Monocoque Frame

La fabricación ACCT está centrada en la Calidad. Todas las etapas de la fabricación están celosamente monitorizadas y siempre validadas mediante un control de calidad. La trazabilidad de las fibras de carbono empleadas en la construcción de nuestros cuadros nos permite controlar el origen y la calidad de nuestra materia prima.

Advanced Custom Carbon Tech manufacturing is focused on quality. All the production steps are closely monitored and always controlled by a quality control check. Traceability of all our carbon fibers is also a way to certificate the origin and the high specs of our raw materials.

La fabrication ACCT est basée sur la Qualité. Toutes les étapes de la fabrication sont jalousement contrôlées et validées toujours grâce à un contrôle de qualité. La traçabilité des fibres de carbone utilisées pour la construction de nos cadres nous permet de contrôler l'origine et la qualité de notre matière première.

UHM Ultra High Modulus Carbon

Capas de carbono unidireccional con una relación peso-resistencia optimizada para lograr la máxima rigidez. Las fibras UHM Toray © cumplen con los test de fatiga más resistentes y certifican la fiabilidad de todos nuestros cuadros.

Unidirectional carbon layers with an optimized strength-weight ratio to achieve the maximum frame rigidity. Toray UHM layers meet the toughest fatigue resistance tests and ensure the excellent level of reliability of all our frames.

Le carbone unidirectionnel, exclusivement conçu pour le Dual Shape Technologie, a pour objectif premier de diminuer le poids et de donner un maximum de rigidité sur les modèles de compétition.

SL Superlight

Una aplicación exclusiva de fibras de carbono y resina durante el proceso de conformado de los tubos que permite aligerar nuestros cuadros de alta gama. Este Know-how forma parte del conocimiento de Massi y es el resultado de nuestra larga experiencia en cuadros de carbono.

An exclusive mix of carbon and resin during the lay-up process achieves an amazing lightness of our higher range frames. This know-how belongs to Massi and it is the result of our long experience in carbon frames.

La combinaison exclusive du carbone et de la résine pendant le processus de fabrication des cadres Massi, permet de proposer des cadres haut de gamme très légers. Ce Know-how forme part de la connaissance de Massi et c'est le résultat de notre longue expérience en cadres de carbone.

ICR RACE Internal Cable Routing

Evolución del sistema ICR que permite ensamblar los cables directamente por el interior de la dirección del cuadro ocultándolos por completo.

Evolution of the ICR system that allows the cables to be assembled directly inside the head tube of the frame, hiding them completely.

Evolution du système ICR qui permet d'assembler les câbles directement à l'intérieur du tube de direction du cadre, en les cachant complètement.

CD Carbon Dropout

Evolución del sistema SSD dónde las punteras de aluminio han sido reemplazadas por otras realizada totalmente en carbono para conseguir menor peso y mayor rigidez.

Evolution of the SSD system where the aluminium dropout is replaced by another one made of carbon to achieve a higher rigidity and lighter weight.

Evolution du système SSD: le carbone remplace l'aluminium, ce qui augmente la rigidité et diminue le poids.

AAS Advanced Alloy Series Frame

Nuestros cuadros de aluminio están siempre diseñados para proporcionar el máximo rendimiento y fabricados con la mejor aleación. Los materiales son elegidos profesionalmente para conseguir los mejores resultados.

Our alloy frames are always designed for the best performance and made of the optimal aluminium alloy. Materials are selected professionally to achieve the best results.

Nôtres cadres en aluminium sont toujours conçus pour fournir une performance maximale et fabriqués avec le meilleur des alliages. Les matériels sont choisis professionnellement à la fin d'obtenir les meilleurs résultats.

TECNOLOGÍA

TB Triple Butted

El conformado con aleación de triple espesor AIRLIGHT se usa en nuestros cuadros de aluminio de alta gama. Esta es la evolución de la aleación Al-Zn-Mg para lograr un menor peso pero conservando el mismo índice de rigidez.

Massi Triple Butted Airlight Tubing is used in our high range alloy frames. This is the evolution of the Al-Zn-Mg Reinforced Butted to achieve a lighter weight but keeping the same rigidity and stability.

Les tubes triple épaisseur Airlight Massi sont utilisés sur les modèles haut de gamme en aluminium. Ils succèdent au Al-Zn-Mg Reinforced Butted pour obtenir plus de rigidité et plus de stabilité, ainsi qu'un gain de poids.

TB Triple Butted Custom Tubing

El mejor equilibrio entre rigidez, resistencia y peso para nuestros cuadros más populares. Los tubos en espesor variable TB son manufacturados con gran precisión para lograr el mejor rendimiento del cuadro.

The best balance among stiffness, endurance and lightweight for our best-selling alloy frames. TB Butted Custom tubes are manufactured with high accuracy to achieve the best performance of the frame.

Le meilleur équilibre entre rigidité, résistance et poids pour nôtres cadres les plus populaires. Les tubes en épaisseur variable TB son manufacturés avec une très grande précision pour obtenir la meilleure performance du cadre.

RB Reinforced Butted

Aleación de alta resistencia con tratamiento térmico posterior para incrementar la resistencia mecánica. Los cuadros realizados en aluminio reforzado poseen una excelente rigidez.

Highly durable aluminium alloy with an extra heat treatment to increase the stress resistance. Reinforced Butted frames have an excellent rigidity and strength.

Aluminium de haute résistance avec capacité à limiter les torsions des tubes et éviter ainsi les déformations tout en augmentant la rigidité et la stabilité du cadre.

STA Smooth Threaded Welding

Soldaduras pulidas que otorgan a nuestros cuadros de aluminio un gran nivel de acabado. El STA garantiza una excelente resistencia y proporciona un acabado limpio y liso a las soldaduras.

Smooth welding treatment for an astonishing finish of our alloy frames. The STA guarantees the maximum welding resistance and features a neat and clean look of the treated areas.

Processus de soudure appliquée à nos cadres Al-Zn-Mg Airlight. Ce procédé spécial permet de faire une soudure propre et lisse, sans altérer la résistance du cadre.

ICG Integrated Cable Guide

Integración de las guías de cable en la caja del pedalier, eliminando la guía y su tornillería, ahorrando unos gramos de peso y mejorando el acabado final.

Integration of the cable guides on the BB shell that eliminates the external cable routing, saving some weight and improving the finish of the frame.

Les câbles sont intégrés dans la structure du moule, éliminant ainsi les guides et les butées de gaines extérieures.

IB Integrated Brake Guide

El tubo hidráulico del freno trasero se ha integrado en el interior de los tirantes para una mayor protección y una mejora notable del acabado estético del cuadro.

The brake hydraulic house is routed inside the seat stay for an improved protection and to achieve a neat and clean good looking frame.

Massi devient la première marque à avoir système de freinage avec passage interne intégral au cadre.

TECNOLOGÍA

ODB Tapered Head Tube 1 1/8 - 1.4"

Tubo de dirección cónico 1 1/8" - 1.4" para una rigidez y resistencia óptimas.

Tapered head tube 1 1/8" - 1 1.4" for an optimum rigidity and strength.

Tube de direction adapté pour le montage d'une fourche avec jeu de direction conique 1 1/8" - 1 1.4", augmentant la rigidité et améliorant le pilotage.

ODB EVO Tapered Head Tube 1 1/8 - 1.5"

Evolución del Sistema ODB para incrementar la rigidez y mejorar las prestaciones en la dirección gracias a la conificación 1 1/8"-1.5".

Evolution of the ODB system to increase the rigidity and to improve the performance of the steering thanks to the tapered head tube 1 1/8"-1.5".

Evolution du système ODB pour augmenter la rigidité et améliorer le comportement de l'avant du vélo, grâce au tube de direction conique de 1 1/8"-1.5".

ICC Integrated Clamp Concept

Algunos de nuestros cuadros de alta gama cuentan con el Sistema ICC que integra la abrazadera de la tija de sillín al cuadro.

Some Massi high range frames feature the ICC system that integrates the seat clamp to the frame geometry.

Les nouveaux modèles de compétition Massi adoptent le système de serrage de tube de selle compact et directement intégré dans le cadre.

PRESS - FIT Direct Mount

Se incrementa la longitud y el diámetro de la caja de pedalier para aumentar la rigidez lateral del cuadro y mejorar la transmisión de los esfuerzos a las bielas. Las cazoletas son más ligeras y se montan directamente sobre el cuadro, sin roscas, lo que reduce notablemente el peso del conjunto.

The length and diameter of the bottom bracket have been increased to improve the lateral stiffness of the frame and enhance the power transmission to the crank set. The cups are lighter and mounted directly on the BB shell, which greatly reduces the overall weight.

Un boîtier de pédalier plus large et d'un diamètre plus grand, favorise la rigidité latérale du cadre et améliore la répartition des efforts sur le pédalier. Les roulements sont plus légers et se montent directement sur le cadre, sans cuvette, réduisant considérablement le poids de l'ensemble.

POST MOUNT Rear Disc Brake

La tecnología Direct Fit incorpora un anclaje postmount para la pinza del freno de disco trasero. El conjunto tiene mayor rigidez que con el sistema IS convencional y en la transmisión de la fuerza de frenado se minimizan las pérdidas de energía.

Direct Fit frames feature a post-mount standard fitting for the rear disc brake caliper. The rigidity of the assembly is improved compared to the traditional IS standard caliper mounting systems and brake efficiency is optimized.

La technologie fit-direct intègre un post Mount pour l'étrier de frein AR. L'ensemble gagne en rigidité la force de freinage et mieux répartie et réduit les pertes d'énergies.

FLAT MOUNT Rear Disc Brake

La tecnología Direct Fit incorpora un anclaje flatmount para la pinza del freno de disco trasero. El conjunto tiene mayor rigidez que con el sistema IS convencional y en la transmisión de la fuerza de frenado se minimizan las pérdidas de energía.

Direct Fit frames feature a post-mount standard fitting for the rear disc brake caliper. The rigidity of the assembly is improved compared to the traditional IS standard caliper mounting systems and brake efficiency is optimized.

La technologie fit-direct intègre un post Mount pour l'étrier de frein AR. L'ensemble gagne en rigidité la force de freinage et mieux répartie et réduit les pertes d'énergies.

TECNOLOGÍA

R12 BOOST 148mm

Tecnología desarrollada para ofrecer una mayor resistencia a la torsión en las ruedas de 29" gracias a un buje de 148 mm para optimizar el ángulo de los radios de las ruedas. Con ello logramos acortar la longitud de las vainas del cuadro sin modificar el Q-Factor, alcanzando una mayor solidez, rigidez y precisión del triángulo trasero.

Technology developed to provide higher torsion resistance on 29" wheels through a 148mm hub, which optimises spokes angle within wheels. Hence, we achieve to shorten the length of the chain stay without modifying the Q-Factor, which provides greater sturdiness, rigidity and precision of both chain and seat stays.

Technologie développée pour offrir une majeure résistance à la torsion dans les roues en 29" à travers d'un moyeu à 148mm, pour optimiser l'angle des rayons dans les roues. Ainsi, on parvient à réduire la longueur de la base arrière sans modifier le Q-Factor, en obtenant une majeure solidité, rigidité et précision du triangle arrière.

FAS Fully Active Suspension System

Sistema de suspensión desarrollado por Massi para lograr un mayor confort, mayor control en la conducción y menor resistencia a la rodadura. La localización del punto de pivotaje se ha determinado con precisión para minimizar las pérdidas de energía y reducir la contaminación en el pedaleo.

Rear suspension system developed by Massi to achieve an increased rider comfort, enhanced wheel contact and control, and less net rolling resistance. Pivot point location has been accurately designed to minimize energy losses and pedaling contamination to the dynamic system.

Est un système de suspension arrière développé par Massi qui élimine les distorsions et donc les pertes de puissance, il garantie aussi une grande sensibilité de la suspension.

ICR Internal Cable Routing

Sistema de cableado interno que permite una reducción de peso eliminando los topes de funda y proteger el cableado que ya no está expuesto a la intemperie.

Internal cable routing system that allows a reduction in weight by eliminating the cable housing stops and protecting the wiring that is no longer exposed to the elements.

Système de câblage interne qui permet de réduire le poids en éliminant les arrêts de gaine de câble et en protégeant le câblage qui n'est plus exposé aux éléments.
